

# Lions of Michigan Foundation Project KidSight

## VISION SCREENING INFORMATION FORM

Our Project KidSight Vision Screening equipment produces an image of a child’s eyes to develop a preliminary determination of the presence of eye disorders, but it does not constitute a diagnosis of vision problems. Vision screening is not a substitute for an eye examination by an optometrist or ophthalmologist, and vision screening does not detect all types of vision problems.

If your child’s Project KidSight Vision Screening result is:

**PASS:** Our screening equipment was unable to detect any vision problems.

**UNREADABLE:** Our screening equipment could not develop reliable results. This can happen if a child looks away during the vision screening process.

**REFER:** Our screening equipment has detected that your child may have one or more of the vision conditions listed.

- |  |  |
|--|--|
| <input type="checkbox"/> Anisometropia (unequal visual clarity)    | <input type="checkbox"/> Anisocoria (difference in size of pupils)             |
| <input type="checkbox"/> Hyperopia (far-sightedness)               | <input type="checkbox"/> Myopia (near-sightedness)                             |
| <input type="checkbox"/> Strabismus (eye misalignment)             | <input type="checkbox"/> Astigmatism (blurred vision – refractive abnormality) |
| <input type="checkbox"/> Gaze (fixed or crossed eye, not tracking) | <input type="checkbox"/> Undetermined  |

If the result of your child’s vision screening is a “Pass” or “Unreadable”, and you suspect your child has a vision problem, please consult an eye care professional.

If the result of your child’s vision screening is a “Refer”, our vision screening equipment detected that your child may have a vision problem, and he/she should be examined by an optometrist or ophthalmologist, as soon as possible. Potential vision problems that could permanently affect your child’s vision can be greatly diminished by taking appropriate steps to obtain professional eye care for your child.

- Please contact an optometrist or ophthalmologist to make an appointment for your child to have a complete eye exam.** If you need help financially or otherwise, please contact the Michigan Department of Health and Human Services at 517-373-3740 (toll free: 1-855-275-6424) or our office to inquire about eye care assistance programs to help your child and family.
- Please authorize your child’s eye care professional to complete and return our Eye Doctor – Referred Child Report Form.** The information provided by your child’s eye doctor will help us validate the results of our vision screening program and improve Project KidSight.
